

GRUNDY CENTER MUNICIPAL UTILITIES

Functionality in Emergency Situations

Back-Up Power

Grundy Center Municipal Utilities has a DMS10 Switch. The battery back-up to this will provide power for up to 8 hours. Grundy Center does have three stand-by generators that can produce power if needed.

Rerouting of Traffic around Damaged Facilities

Grundy Center Municipal Utilities does not have redundant facilities but is prepared to repair any facilities as quickly as possible.

Traffic Spikes

Grundy Center Municipal Utilities DMS10 has 96 trunks with an approximate customer trunk ratio of 11 to 1. Grundy Center Municipal Utilities switch usually runs at less than 20% of capacity allowing unused capacity to support traffic spikes.
